Derivation method

```
git log --all --oneline -S "BOB-015" -- docs/Fixed.md | tail -1  
git log -1 --format=%cI "a8916c0658acc3acd443f8b4ccd052c0d33615a6"
```

The commit above is the OLDEST commit whose pickaxe on docs/Fixed.md first introduces the literal BOB-015, so it marks the moment the item transitioned into the closed archive. The commitâ€™s own change may document the closure (renames, seed, sync, or explicit close).

Honest boundary (Â§11.4.6)

- Exact closure operator + timestamp are unrecoverable from pre-mandate history; by='AI' records the backfill agent, with AI-inferred documented in item_history.reason.
- This artefact fulfils the Â§11.4.146(D3) status-custody chainâ€™s captured-evidence requirement for the backfilled row; it does NOT retroactively validate the ORIGINAL closure decision.
