

Scripts_Summary

Scripts Summary

Build, validation, and utility scripts for the Boba project.

Contents

- `codegraph_validate.md` — Anti-bluff verifier for the CodeGraph integration (Constitution §11.4.78 step 4). Proves the local CodeGraph index is real and correctly scoped using facts from CodeGraph CLI + MCP only.

Status

- Domain: Scripts
- Docs count: 1
- Last reviewed: 2026-06-08

Key Scripts (source)

Script	Purpose
<code>scripts/pre_build_verification.sh</code>	Pre-build gate: 24 invariants (constitution, infrastructure, exports, workable-items, docs chain engine)
<code>scripts/workable-items-export.sh</code>	3-step pipeline: workable-items DB export → domain summaries → HTML/PDF/DOCX (renamed 2026-08-15 BOB-104 from <code>docs_chain.sh</code> — that name was a misnomer; the REAL Docs Chain §11.4.106 engine lives at <code>constitution/submodules/docs_chain/</code>) Real §11.4.106 Docs Chain engine (Go binary) — verify /

Script	Purpose
constitution/submodules/ docs_chain/docs_chain	sync / doctor / graph / watch against .docs_chain/contexts/ *.yaml
scripts/boba-ctl.sh	boba-ctl CLI wrapper (Go binary orchestrator)
scripts/ generate_markdown_exports.sh	Universal Markdown → HTML/ PDF/DOCX export (§11.4.65)
scripts/run-tests.sh	Test suite runner (hermetic/live/ all)
scripts/run_all_challenges.sh	Challenge suite runner
ci.sh	Full local CI pipeline
