Go merge-search fixes — BUG-3 + BUG-4

Revision: 1 **Last modified:** 2026-06-15T00:00:00Z

TDD per §11.4.43 / §11.4.115 (RED-on-broken-artifact → GREEN).
Resource-limited runs: GOMAXPROCS=2 nice -n 19 go test -race.
Work scoped to qBitTorrent-go/. No commit/push.

Files changed

- qBitTorrent-go/internal/service/merge_search.go — RunSearch dedup + merged snapshot (BUG-3)
- qBitTorrent-go/internal/api/search.go — GetSearchHandler now returns merged Results (BUG-4)

RED tests added

- qBitTorrent-go/internal/service/runsearch_dedup_test.go
TestRunSearch_NoDuplicateAccumulation — httptest qbit stub returns the SAME single result on every poll (Running x3 → Stopped). Asserts len(GetLiveResults)==1, MergedResults==1, len(GetMergedResults)==1.
- qBitTorrent-go/internal/api/getsearch_results_test.go
TestGetSearch_ReturnsResults — seeds a completed search with 2 merged via SetMergedResults, GET /api/v1/search/{id}, asserts len(resp.Results)==2.

BUG-3 root cause + fix

RunSearch's 500ms ticker called GetSearchResults(id,100,0) at a FIXED offset 0 and appended ALL rows every tick; nothing deduped and SetMergedResults was never called → MergedResults stayed 0. Fix: per-search seen map keyed on

FileURL (fallback name+size) skips duplicates; on Stopped, the deduplicated accumulation is snapshotted into lastMergedResults and meta.MergedResults is set.

BUG-4 root cause + fix

GetSearchHandler built SearchResponse WITHOUT Results → Go-profile grid empty on every search_complete GET. Fix:
results, _ := svc.GetMergedResults(id) (fallback GetLiveResults),
set Results: results.

RED evidence (pre-fix, broken artifact)

```
--- FAIL: TestRunSearch_NoDuplicateAccumulation (2.01s)
    ... should have 1 item(s), but has 4
    ... BUG-3: MergedResults must reflect the merged count (1),
got 0
    ... BUG-3: GetMergedResults must return the deduplicated
merged set (1), got 0
FAIL    github.com/milos85vasic/qBitTorrent-go/internal/service
--- FAIL: TestGetSearch_ReturnsResults
    ... BUG-4: final GET must return the merged results, got 0
(panic index out of range)
FAIL    github.com/milos85vasic/qBitTorrent-go/internal/api
```

GREEN evidence (post-fix)

```
ok      github.com/milos85vasic/qBitTorrent-go/internal/service
3.239s  (TestRunSearch_NoDuplicateAccumulation)
ok      github.com/milos85vasic/qBitTorrent-go/internal/api
1.315s  (TestGetSearch_ReturnsResults)
```

Full suite (GOMAXPROCS=2 nice -n 19 go test -race ./internal/...)
