

# Issues – Open Workable Items

**Revision:** 4 **Last modified:** 2026-06-06T19:00:00Z **Ticket prefix:** BOB (operator-mandated, 2026-06-06) **Scope:** Open/active items only. Closed items migrate to [Fixed.md](#).

Tracking interim: this is the Markdown tracker. The full constitution-grade SQLite single-source-of-truth + docs\_chain engine + procedure docs are themselves tracked below as **BOB-010** (not yet built). Until then this file + [Issues\\_Summary.md](#) are authoritative for open work.

---

## §1. [BOB-015] Remaining public-tracker failures are external / non-deterministic

**Status:** Queued **Type:** Bug **Severity:** Low **Created:** 2026-06-06

systematic-debugging FINDING (determinism test): the residual per-tracker failures are **external/non-deterministic** (site availability + network from this host), NOT code root causes. Two consecutive identical live searches: run A = 909 results / 14 success / 10 error; run B = **1422 results / 19 success / 5 error**; nyaa, piratebay, snowfl, torlock flipped error→success with **zero** success→error flips. The orchestrator already isolates per-tracker failures (other trackers succeed), so impact is bounded.

Residual (external-triggered): kickass (timeout), tokyotoshokan (SSL EOF; also crashes ungracefully on empty response – minor missing guard), yts (intermittent). The deterministic jackett crash within this set was split out and FIXED as **BOB-016**. RuTracker CAPTCHA is **BOB-008**. **Resolution direction:** low priority; optionally add empty-response guards to the crash-prone plugins (defense-in-depth) – upstream sites™ availability is outside our control.

## §3. [BOB-008] RuTracker automated login blocked by CAPTCHA

**Status:** Operator-blocked **Type:** Bug **Created:** 2026-06-06 **Operator-Block-Details:** WHAT – RuTracker login with stored creds returns no session cookie (CAPTCHA wall). WHY – automated user/pass login is CAPTCHA-gated; self-resolution exhausted (creds correct + wired, login attempted, auth=True). UNBLOCK – operator completes the CAPTCHA flow at /api/v1/auth/rutracker/captcha + /login, or pastes a fresh bb\_session cookie via /auth/rutracker/cookie-login. WHO – operator.

**Evidence:** live search per-tracker stat `rutracker status=error auth=True error="login returned no session cookie"` – likely CAPTCHA.

## §5. [BOB-009] Containers submodule (§11.4.76) not integrated

**Status:** Queued **Type:** Task **Created:** 2026-06-06

.gitmodules lists only constitution. The constitution mandates consuming vasic-digital/containers for container orchestration; the project uses docker-compose.yml + start.sh instead. **Resolution direction:** add the submodule + boot via its pkg/boot/pkg/compose/pkg/health, or record a justified deviation.

## Â§6. [BOB-010] Workable-items SQLite DB + docs\_chain + procedure docs not set up

**Status:** Queued **Type:** Task **Created:** 2026-06-06

The constitution-grade tracking system (SQLite single-source-of-truth per Â§11.4.93/Â§11.4.95, docs\_chain engine per Â§11.4.106, 5 procedure docs per Â§11.4.63, per-domain Status/Status\_Summary docs per Â§11.4.45/Â§11.4.56) is not present. This Markdown tracker (Issues/Fixed + summaries, BOB prefix) is the interim. The Go workable-items tool is scaffolded in the constitution submodule (constitution/scripts/workable-items/) but not integrated.

## Â§8. [BOB-012] Many docs lack HTML/PDF exports; no export-sync gate (Â§11.4.65)

**Status:** Queued **Type:** Task **Created:** 2026-06-06

docs/ is ~65% export-covered; docs/CONTINUATION.md and ~24 docs/research/\*\* files lack HTML/PDF siblings, and no pre-build gate/hook enforces export sync. **Resolution direction:** regenerate all exports + add a CM-MARKDOWN-EXPORT-SYNC-class gate.
