

Completion Status – Part A Cross-Check

Revision: 1 Last modified: 2026-06-06T00:00:00Z

Maps each A finding from the completion initiative plan to its resolution.

A Finding	Issue	Resolution	Commit(s)
A.1	71 runtime skipIf skips hiding broken services	Converted to fixture-gated dependencies; meta-test test_no_runtime_service_skips.py guards the invariant	726bf8e, 55d29ce
A.2	No frontend test scaffolding	Angular 21 dashboard with Vitest unit tests; test_frontend_spec_coverage.py guards spec presence	cfbf7d6, e218593, 972b9ca
A.3	Dead code – unclassified plugins, no audit	Plugin audit matrix (docs/ PLUGIN_AUDIT.md); non-canonical plugins moved to plugins/community/ socks.py and ui/ documented as static assets	6c75db6, e130e2f, 2a64686, 1407ed2
A.4	Concurrency hazards – unbounded caches, no locks	asyncio.Semaphore, TTLCache, asyncio.Lock around shared mutable state, graceful shutdown with signal handler, Tenacity retry, SSE disconnect handling	311dae1, 8d4a429, 0b44162, d369879, 49a99d0, f43ad5e, 1447d0f
A.5	No security tooling	5 scanners configured: SonarQube (sonar-project.properties), Snyk (.snyk), Semgrep (.semgrep.yml), Trivy (.trivyignore), Gitleaks (.gitleaks.toml); orchestrated by scripts/scan.sh	84d1355, e3bebb6, 106f63f
A.6	Documentation gaps – missing READMEs, no diagrams	Per-module READMEs in download-proxy/src/ and sub-packages; architecture diagrams (request-lifecycle, container-topology, plugin-execution, shutdown-sequence); expanded USER_MANUAL; OpenAPI freeze test; docs link-integrity test	7808ff1
A.7	No coverage gate	fail_under raised from 1% to 49% (actual measured); COVERAGE_BASELINE.md tracks per-module numbers	df18c8d, Phase 10 update
A.8	No load/stress/chaos test scaffolding	Test suites added: tests/property/, tests/memory/, tests/ concurrency/, tests/observability/, load/stress/chaos scaffolds	972b9ca, 1c1f23d
A.9	No project website	MkDocs Material website in website/ with GitHub Pages workflow, Mermaid diagrams, and full nav	2dde156, ee87eba

Findings	Issue	Resolution	Commit(s)
A.10	No course content	Course scaffolding in courses/ with demo scripts	da7da4a

Verification Commands

```
# A.1 " meta-test passes
python3 -m pytest tests/unit/test_no_runtime_service_skips.py -q --import-

# A.2 " frontend spec coverage
python3 -m pytest tests/unit/test_frontend_spec_coverage.py -q --import-mo

# A.3 " plugin audit exists
test -f docs/PLUGIN_AUDIT.md && echo "OK"

# A.4 " concurrency primitives present
grep -rq "Semaphore\|TTLCache\|asyncio.Lock" download-proxy/src/

# A.5 " scanner configs present
ls .semgrep.yml .gitleaks.toml .trivyignore .snyk sonar-project.properties

# A.6 " documentation integrity
python3 -m pytest tests/docs/ -q --import-mode=importlib
```
