|   |       |        |      |                 | scratch path report 0 across all palette x mode combinations. This is therefore correct at the SOURCE layer and absent at the ARTIFACT layer, so §11.4.108 layer 2 is NOT closed and end users still see the low-contrast dashboard. Two compounding facts make this situation rather than obvious: dist/ is gitignored, so the divergence never shows in a diff; and scripts/install.sh:133 asserts only that the directory EXISTS, never that it is newer than the sources it was built from, so a stale bundle passes inspection unchallenged. Acceptance: install (an equivalent gate) FAILS on a bundle older than its sources, the bundle is rebuilt, and docs/qa/BOB-164/axe_contrast_scan.py against download-proxy/src/ui/frontend/browser exits 0 with zero violation nodes and zero blocking incomplete nodes. |
