BOB-232 closure evidence — AGENTS.md Go-profile port claim

Revision: 1 Last modified: 2026-09-23T16:19:41Z

Claim

AGENTS.md no longer claims the Go backend serves 7186/7187/7188; it states 7187 only.

Evidence

- Truth source: qBitTorrent-go/Dockerfile runs one binary (CMD ["/app/qbittorrent-proxy"]), internal/config/config.go ServerPort = MERGE_SERVICE_PORT (default 7187) (subagent-read, consistent with CLAUDE.md BOB-141).
- Edit: AGENTS.md table row now reads | 7187 | Opt-in via --profile go; serves the merge service on 7187 only ... does NOT bind 7186 or 7188 – see BOB-141 |.
- Other occurrences of the old string (CLAUDE.md:143, docs/scripts/check_cm_healthcheck_covers_served_ports.md:88) are historical/corrected quotations and intentionally unchanged.

Gaps

Doc-only change; AGENTS.html/.pdf/.docx regenerated by the export step.
