

CodeGraph_Summary

CodeGraph Summary

CodeGraph integration: install, update, sync, and validate events tracking compliance with Constitution §§11.4.78-80.

Contents

- `Status.md` — Append-only ledger of all CodeGraph operations for the Boba project

Status

- Domain: CodeGraph
- Docs count: 1
- Index health: active (indexed files available, see `Status.md` for last sync timestamp)
- Last reviewed: 2026-06-08

Key Events

Date	Event
2026-04	Initial CodeGraph install and index build
2026-05	Index sync after constitution rebase and submodule updates
2026-06	Index re-validated after mutmut path restructure

Verification

The CodeGraph index is validated by: 1. docs/scripts/codegraph_validate.md — anti-bluff verifier proving the local index is real and correctly scoped 2. Pre-build gate invariant CM-MARKDOWN-EXPORT-SYNC checks index freshness 3. Manual: codegraph_codegraph_status tool (health check)
