

nnmclub-cookie-harvest

nnmclub-cookie-harvest.mjs

Revision: 1 Last modified: 2026-06-16T00:00:00Z

Overview

Playwright headless-Chromium harvester that logs into nnmclub and emits the NNMCLUB_COOKIES header string (phpbb2mysql_4_sid + phpbb2mysql_4_data + cf_clearance). Reuses the repo's installed Chromium (from extension/ / frontend/ node_modules).

Prerequisites

- Node + Playwright + a Chromium install (present via the extension/ frontend dev deps).
- NNMCLUB_USERNAME / NNMCLUB_PASSWORD in the environment (never printed, §11.4.10).

Usage

```
node scripts/nnmclub-cookie-harvest.mjs
    # headless attempt
NNMCLUB_HARVEST_HEADFUL=1 node scripts/nnmclub-cookie-
harvest.mjs
    # visible browser, one-time manual Turnstile solve
```

Normally invoked via scripts/nnmclub-cookie-refresh.sh, which captures stdout into .env and restarts the proxy.

The Turnstile reality (verified, §11.4.6)

nmclub login.php is gated by a **Cloudflare Turnstile** JS CAPTCHA (sitekey 0x4AAAAAAhS8bNcgfb-0Kni). A real-browser probe confirmed the username / password / login fields are present and fillable — it is **not** a selector/timing bug — but Turnstile renders an *interactive*, bot-detected challenge that does **not** auto-resolve in managed mode. Therefore:

- **Headless (unattended) login fails by design** — the script exits non-zero with an honest diagnostic; it never fabricates a session and writes no cookie.
- **Working paths:** a one-time headful solve (NNMCLUB_HARVEST_HEADFUL=1), or supply browser cookies via scripts/extract-tracker-cookies.sh ~/Downloads/nmclub.txt nmclub.

Outputs / exit codes

- **stdout:** NNMCLUB_COOKIES header string on success (consumed by the refresh script; never logged).
- **Exit 0:** session obtained (phpbb2mysql_4_sid present).
- **Exit non-zero:** Turnstile block / timeout / bad creds — honest diagnostic, no secret leaked.

Related

- scripts/nmclub-cookie-refresh.sh — wiring (writes .env, restarts proxy).
- scripts/extract-tracker-cookies.sh — browser-jar → tracker-cookie extractor (the reliable path).
- download-proxy/src/merge_service/search.py — consumes NNMCLUB_COOKIES.

Last verified: 2026-06-16 (headless Turnstile-block finding captured with the real sitekey).
