Known Issues

1. **BOB-008:** RuTracker CAPTCHA â€” operator-blocked (needs manual cookie paste)
 2. Go backend is a skeleton (documented in AGENTS.md)
 3. Containers may be down on session start â€” `bash start.sh` first
 4. macOS + podman `network_mode: host` does NOT forward ports â€” `ensure-macos-tunnel.sh` handles this
-

Quick-Start

```
# Pre-build gate
bash scripts/pre_build_verification.sh
```

```
# Unit tests
python3 -m pytest tests/unit/ -q --import-mode=importlib

# Coverage
python3 -m pytest tests/unit/ --cov=download-proxy/src --cov=plugins --cov=

# Lint + typecheck
ruff check . && mypy download-proxy/src/

# Frontend
cd frontend && npx vitest run

# Containers
bash start.sh && bash stop.sh
```
