BOB-088 — Closure Evidence

Date: 2026-09-25 (discovered via BOB-238 investigation, independently re-verified by the conductor)

Status: Completed (→ Fixed.md)

Already implemented at commit

7b45113c6b03524d9c799bdd68496ec202575e4c (2026-08-21): scripts/testing/update_readme_doc_links.sh (new generator, 259 lines) + docs/scripts/update_readme_doc_links.md (companion doc) + tests/unit/test_update_readme_doc_links_no_duplication.sh (regression test). Both new files' own in-source text explicitly cite "BOB-088 (the tracked item this script closes)."

Re-verified independently by the conductor:

```
$ bash tests/unit/test_update_readme_doc_links_no_duplication.sh
PASS: exactly one 'Issues' row after rewrite (no table
duplication)
PASS: stale Revision refreshed to the real live value (115)
PASS: content after the table block ('### Next section')
survived the rewrite
PASS: end marker present exactly once
PASS: second run is idempotent (no further changes)
RESULT: 5 passed, 0 failed
```

Full investigation citing the exact README.md diff (stale doc-link table rows corrected, new GOVERNANCE_AUDIT_2026-08-08_ROUND2 row added): docs/qa/BOB-238/investigation_20260925.md.

Classification: project-specific (§11.4.17) — doc-sync tooling, no constitution change.
