BOB-238 — Closure Evidence

Date: 2026-09-25 **Status:** Completed (→ Fixed.md)

Disposition

All five referenced items were individually investigated (evidence: docs/qa/BOB-238/investigation_20260925.md) and each disposition was independently re-verified and applied by the conductor:

- **BOB-088** — commit 7b45113 already closed it. Closed (Completed).
- **BOB-110** — commit 7b45113 already closed it. Closed (Completed).
- **BOB-106** — commit 7b45113 partially addressed it (guard built + self-tested, wiring + brownfield-adoption decision still owed via sibling BOB-162). Advanced to In progress with a corrected description.
- **BOB-159** — commit 7b45113's own diff FILED this item, honestly stating the work was not done. Confirmed via `git show`. Left open, investigation note added so nobody re-derives this by accident again.
- **BOB-162** — same pattern as BOB-159. Left open, investigation note added.

This item's own acceptance criterion — investigate all 5 referenced items and apply the correct disposition to each — is fully met.

Classification

Project-specific (§11.4.17) — workable-item tracker reconciliation.
