		Completed (→ Fixed.md)			BOB-103 — Land docs_chain (git@github.com:vasic-digital/docs_chain.git) as depth-1 reusable-engine submodule at constitution/submodules/docs_chain/ pinned to helixcode-v1.1.0. Build engine binary. Wire pre-build gate invariant 24 CM-DOCS-CHAIN-ENGINE-VERIFY into scripts/pre_build_verification.sh (real docs_chain verify -all against .docs_chain/contexts). Add challenges/scripts/docs_chain_verify_challenge.sh with §11.4.115 RED_MODE polarity. Retire scripts/docs_chain.sh misnomer wrapper by renaming to scripts/workable-items-export.sh (git mv, history preserved) and updating active callers (pre_build_verification.sh + 2 test files + 3 current-state docs). Constitution commit 47d41f8 pushed to all 6 mirrors. Boba-side commit follows this workable-item creation. [Reconciled 2026-08-18 via BOB-072/073 SSoT-integrity remediation: original item's Fixed-location DB row was deleted by a Fixed.md md-to-db reparse before this restoration ran (BOB-103 had never been written into docs/Fixed.md text) — original item_history rows (id=66 Opened 2026-08-15, id=67 Completed 2026-08-15, evidence challenges/scripts/docs_chain_verify_challenge.sh) survive untouched and remain the authoritative closure record; this add+close pair is a mechanical items-row restoration, not a re-performance of the original 2026-08-15 work.]
