

Issues “ Open Workable Items

Revision: 2 **Last modified:** 2026-06-06T18:00:00Z **Ticket prefix:** BOB (operator-mandated, 2026-06-06) **Scope:** Open/active items only. Closed items migrate to [Fixed.md](#).

Tracking interim: this is the Markdown tracker. The full constitution-grade SQLite single-source-of-truth + docs_chain engine + procedure docs are themselves tracked below as **BOB-010** (not yet built). Until then this file + [Issues_Summary.md](#) are authoritative for open work.

§1. [BOB-015] Individual public-tracker plugins error/time-out after the systemic fix

Status: Queued **Type:** Bug **Severity:** Medium **Created:** 2026-06-06

After BOB-005 (systemic import failure) was fixed, 14 public trackers now return results, but a few still error with DISTINCT, per-plugin causes (no longer the shared import failure): - per-plugin runtime exceptions: piratebay, jackett, tokyotoshokan - per-tracker 25s deadline timeouts: kickass, nyaa, torlock - snowfl: “plugin parse failed (upstream HTML likely changed)”

Evidence: live search / tmp/boba_search2.json “ 14 success / 10 error, total 909 results (vs 49 before BOB-005 fix). Each needs its own investigation (parse update / timeout tuning / per-plugin import). RuTracker is tracked separately as BOB-008 (CAPTCHA).

§2. [BOB-006] NNMClub username/password login not wired (cookie-only)

Status: Queued **Type:** Feature **Created:** 2026-06-06

The code consumes only NNMCLUB_COOKIES; the operator-provided NNMCLUB_USERNAME/NNMCLUB_PASSWORD are stored in .env but never used, so NNMClub is not enabled. Implement a username/password “ session-cookie login (POST / forum/login.php, capture phpbb2mysql_4_sid) as a fallback when NNMCLUB_COOKIES is unset, storing into _tracker_sessions["nnmclub"]. **Plan:** plugins/nnmclub.py login() fallback + search.py enable/auth checks + auth.py /nnmclub/login + /nnmclub/status + tests + challenge.

§3. [BOB-008] RuTracker automated login blocked by CAPTCHA

Status: Operator-blocked **Type:** Bug **Created:** 2026-06-06 **Operator-Block-Details:** WHAT “ RuTracker login with stored creds returns no session cookie (CAPTCHA wall). WHY “ automated user/pass login is CAPTCHA-gated; self-resolution exhausted (creds correct + wired, login attempted, auth=True). UNBLOCK “ operator completes the CAPTCHA flow at / api/v1/auth/rutracker/captcha + /login, or pastes a fresh bb_session cookie via /auth/rutracker/cookie-login. WHO “ operator.

Evidence: live search per-tracker stat rutracker status=error auth=True error="login returned no session cookie â€” likely CAPTCHA".

Â§4. [BOB-007] RuTor credentials are unusable (public tracker, no login)

Status: Queued **Type:** Task **Created:** 2026-06-06

RuTor is a public tracker with no authentication endpoint; the code consumes only RUTOR_PROXY_*/RUTOR_USE_MAGNET/RUTOR_USER_AGENT. The operator-provided RuTor username/password (stored in .env) cannot be used. **Resolution direction:** document RuTor as public-only in CLAUDE.md/AGENTS.md; confirm with operator whether to keep the unused creds. Likely closes as Obsolete (reason feature-removed/not-applicable) per Â§11.4.90 â€” pending operator confirmation (Â§11.4.122).

Â§5. [BOB-009] Containers submodule (Â§11.4.76) not integrated

Status: Queued **Type:** Task **Created:** 2026-06-06

.gitmodules lists only constitution. The constitution mandates consuming vasic-digital/containers for container orchestration; the project uses docker-compose.yml + start.sh instead. **Resolution direction:** add the submodule + boot via its pkg/boot/pkg/compose/pkg/health, or record a justified deviation.

Â§6. [BOB-010] Workable-items SQLite DB + docs_chain + procedure docs not set up

Status: Queued **Type:** Task **Created:** 2026-06-06

The constitution-grade tracking system (SQLite single-source-of-truth per Â§11.4.93/Â§11.4.95, docs_chain engine per Â§11.4.106, 5 procedure docs per Â§11.4.63, per-domain Status/Status_Summary docs per Â§11.4.45/Â§11.4.56) is not present. This Markdown tracker (Issues/Fixed + summaries, BOB prefix) is the interim. The Go workable-items tool is scaffolded in the constitution submodule (constitution/scripts/workable-items/) but not integrated.

Â§7. [BOB-011] DOCX export not supported

Status: Queued **Type:** Feature **Created:** 2026-06-06

scripts/generate_markdown_exports.sh produces HTML (pandoc) + PDF (weasyprint) but no DOCX. The operator wants DOCX too. **Resolution direction:** add a pandoc -t docx branch (pandoc is installed).

Â§8. [BOB-012] Many docs lack HTML/PDF exports; no export-sync gate (Â§11.4.65)

Status: Queued **Type:** Task **Created:** 2026-06-06

docs/ is ~65% export-covered; docs/CONTINUATION.md and ~24 docs/research/** files lack HTML/PDF siblings, and no pre-build gate/hook enforces export sync. **Resolution direction:** regenerate all exports + add a CM-MARKDOWN-EXPORT-SYNC-class gate.
