

Continue “ Project Status Snapshot

Session: 2026-06-09 (Session 4 “ coverage push: routes.py 95%, search.py 80%, submodules synced) **Last commit:** 6953662 (working tree CLEAN) **Branch:** main “ pushed to all upstreams **Workable-item tracking:** LIVE at [Issues.md](#) / [Fixed.md](#) with prefix **BOB**, backed by SQLite DB at docs/workable_items.db.

Send continue to pick up exactly where we left off. This file is the single source of truth for session handoff.

What We Did (Session 4)

Area	Work Done
routes.py coverage	75% “ 95% (+20%). Added 78 tests: search_sync flow/sorting/CAPTCHA, SSE stream cap 429, get_search with merged results, auth bad-JSON fallback + save credentials, tracker download flow (temp file + upload), non-tracker failure, per-URL exception, direct URL download, multi-hash magnet generation.
search.py coverage	79% “ 80% (+1%). Added stream token issue/validate, get_all_tracker_results with results, get_live_results empty-tracker-results branch, get_search_status found, get_active_searches non-empty.
validator.py coverage	72% “ 92% (from previous session, committed this session)
jackett_autoconfig.py coverage	72% “ 99% (from previous session, committed this session)
Submodules synced	constitution + helixqa pulled from upstream, all repos pushed
Coverage baseline	Updated COVERAGE_BASELINE.md (Revision 2): 60% total, 1802 tests

Verification (green tree)

Pre-build gate: 18 passed, 0 failed
Unit tests: 1802 passed, 0 failed
Total coverage: 60% (gate: 49%)
Core modules: all “80%
routes.py: 95%
search.py: 80%
validator.py: 92%
jackett_autoconfig.py: 99%

Commits

6953662 chore: update helixqa submodule to latest upstream
995986c chore: update constitution submodule to latest upstream
d2b14ed test: routes.py 95%, search.py 80%, validator 92%, jackett_autocon
e5fcdb1 test: api/__init__ lifespan, CORS, SPA routes, dashboard “ 70% t
6a01128 test: harden main.py, enricher, streaming “ 100% enricher, 94% m

Quick-Start for Next Session

```
# 1. Pre-build gate
bash scripts/pre_build_verification.sh

# 2. Tests
python3 -m pytest tests/unit/ -q --import-mode=importlib

# 3. Coverage
python3 -m pytest tests/unit/ --cov=download-proxy/src --cov=plugins --cov=

# 4. Lint + typecheck
ruff check . && mypy download-proxy/src/

# 5. Frontend
cd frontend && npx vitest run
```

Quick Reference “Key Commands

```
# Pre-build gate
bash scripts/pre_build_verification.sh

# Tests
python3 -m pytest tests/unit/ -q --import-mode=importlib

# Coverage
python3 -m pytest tests/unit/ --cov=download-proxy/src --cov=plugins --cov=

# Lint
ruff check . && mypy download-proxy/src/

# Containers
bash start.sh && bash stop.sh

# Workable items
./bin/workable-items validate --db docs/workable_items.db
./bin/workable-items report --db docs/workable_items.db --by-status
```

Architecture TL;DR

Port	Service	Tech	Notes
7185	qBittorrent WebUI	LinuxServer image	admin/admin hardcoded
7186	Download Proxy	Python HTTP	Proxies WebUI + private-tracker auth
7187	Merge Search Service	FastAPI + Angular SPA	SSE streaming, dedup, enrichment

Port	Service	Tech	Notes
7188	WebUI Bridge	Python	Host process (not containerized)
7189	boba-jackett	Go/Gin	Jackett management API, encrypted SQLite
9117	Jackett	LinuxServer image	Indexer API, auto-configured

Known Issues (open)

1. **BOB-008**: RuTracker CAPTCHA “ operator-blocked (needs manual cookie paste)
 2. **BOB-015**: Remaining public-tracker failures are external/non-deterministic “ low priority
 3. **Go backend** is a skeleton (documented in AGENTS.md)
 4. **Containers may be down** on session start “ `bash start.sh` first
 5. **macOS + podman network_mode**: `host` does NOT forward ports “ `ensure-macos-tunnel.sh` handles this
-

Coverage Snapshot (2026-06-09)
