BOB-093 closure evidence 2026-09-23 (read-only live verification)

Container: qbittorrent-proxy (healthy). Nothing restarted/modified.
Reads via podman exec cat only.

1. Deployed == repo (sha256)

```
container /config/qBittorrent/nova3/engines/rutracker.py :  
98e3cb71f3bc06633c9defba8f2be881eda3444f17306d3644de684164e6f858  
repo plugins/rutracker.py :  
98e3cb71f3bc06633c9defba8f2be881eda3444f17306d3644de684164e6f858  
copy of container file (podman exec cat > scratch) :  
98e3cb71f3bc06633c9defba8f2be881eda3444f17306d3644de684164e6f858
```

Bounded quantifiers grep'd inside the container:

```
140:     re_search_queries = re.compile(r'<a[^\>]{0,512}?  
href="tracker\.php\[^\"]{0,256}?start=\d+)"')  
151:     re_threads = re.compile(r'<tr id="trs-tr-\d{1,12}.  
{0,4096}?</tr>', re.S)
```

2. Existing regression tests (tests/stress/ test_rutracker_redos_bounds.py + tests/unit/ test_plugin_rutracker.py), nice -n 19, timeout 300

Repo copy is byte-identical to deployed (section 1), so this exercises the
deployed bytes.

```
.....

```
99 passed in 12.32s
```

```
real    0m14.138s
```

```
user    0m13.209s
```

```
sys 0m0.794s
```

3. Deployed-copy probe with control needle (same interpreter/path/inputs)

Probe loads the container-extracted file; CONTROL uses the historical unbounded patterns.

```
DEPLOYED re_threads tr_storm 64KB : 0.1995s  
DEPLOYED re_torrent_data gtlr 2KB : 0.000012s  
DEPLOYED re_torrent_data ts 4KB : 0.0049s  
CONTROL unbounded tr_storm 64KB : 1.4025s  
CONTROL unbounded gtlr 2KB : 3.2513s
```

```
real    0m5.022s
```

```
user    0m4.925s
```

```
sys 0m0.037s
```

Reading: bounded deployed regexes finish in $\leq 0.2s$ where the unbounded control takes 1.4s (tr storm) and 3.25s (gtlr) on the same inputs, so the instrument sees the blow-up and the deployed code does not exhibit it.

Honest gaps

- Tests import the repo path, not the container path; equivalence rests on the identical sha256, not on executing inside the container (no exec of python in container performed).
- Sub-step 4 (time a LARGE REAL rutracker result page $< 2s$) NOT met: needs live rutracker access; previously blocked by 403 (see Issues.md). Synthetic adversarial inputs only.
- Tracker item BOB-093 NOT closed.
