## BOB-169 closure evidence — 2026-09-23 (staleness-corrected closure)

### Finding

This item's own round4\_G0.md (2026-08-25) recorded two items “still owed”: (1) bulk regeneration of the 301 charset-less exports — “mechanism present, correctly sequenced... run not performed, needs a quiescent tree”; (2) BOB-182's operator ratchet-adoption decision, needed “before first enforcement”. Both were resolved by later, subsequent work (commits 094ef87/e2d498a “docs(BOB-169,BOB-188): regenerate every export charset-clean” + BOB-182's 2026-08-26 recorded operator decision), but the tracker status was never advanced to reflect it.

### Independent verification (coordinator, from clean shell, 2026-09-23)

```
$ bash scripts/pre_build/check_cm_export_charset_valid.sh
generated exports scanned ..... 410
declaring a charset ..... 410
MISSING a charset ..... 0    (ratchet baseline 0)
PASS: CM-EXPORT-CHARSET-VALID — 0 charset-less exports, at
baseline (no regression, ratchet current)
```

All 410 exports (more than the original 334-file corpus — new docs added since carry charsets from birth) declare a charset, zero missing.

```
$ head -3 docs/BOBA_DATABASE.html
<!DOCTYPE html>
```

```
<html xmlns="http://www.w3.org/1999/xhtml">  
<head>
```

The originally-cited fragment example now begins with a proper DOCTYPE + head (charset inside), confirmed standalone-document output.

## Status

Fixed. Closed by coordinator after independent re-verification that the “still owed” bulk-regeneration + ratchet-adoption gaps are both resolved.
