Boba — Feature Status (all components)

Revision: 1 **Last modified:** 2026-06-15T00:00:00Z **Scope:** Every system component, service, infrastructure piece, and client app of the Boba project — one row per feature, grouped by component. **Authority:** assembled by READ-ONLY repo inventory (codegraph + grep + source reading) on 2026-06-15. Cross-references AGENTS.md, CLAUDE.md, docs/REMAINING_WORK_PLAN.md.

Captured-evidence-driven (§11.4.5 / §11.4.45 / §11.4.86). Every feature row cites a real source file (file:line where load-bearing). **No invented features** (§11.4.6). The **Video-recording confirmation** column is PENDING for every row — playback/UI screen recordings are NOT yet captured; they are a follow-up (§11.4.107/§11.4.143).

Column legend: - **Impl** = implemented / partial / stub - **Wired** = reachable on a running default-profile stack (yes / no / opt-in / host) - **Tests** = test types present + cite file (unit / integration / e2e / security / stress-chaos / property / contract); none if no covering test found - **Validation** = honest validation posture (tested-green-in-suite / unit-only / live-evidence-captured / not-validated / operator-blocked) - **Video** = video-recording confirmation — PENDING everywhere this revision

Components NOT inventoried / discrepancies (honest gaps, §11.4.6)

- **`boba-ctl.sh`** — referenced in tooling but no file exists at repo root or `scripts/`; could not inventory its subcommands.
- **`plugins/torrentproject.py` / `plugins/torrentscsv.py`** — named in the `install-plugin.sh` curated array but absent from the tree; marked not-implemented-in-repo above.
- **Prometheus/OpenTelemetry metrics** — `tests/observability/test_metrics_exist.py` + `observability/` dir exist, but no `prometheus_client Counter()/Histogram()/Gauge()` definitions were found in `download-proxy/src`; metrics surface is via `GET /api/v1/stats` (counters maintained in-process), not a `/metrics` Prometheus endpoint. Stated as fact, not assumed.

- **Video-recording confirmation** — PENDING for ALL 135 rows; no playback/UI screen recordings captured this revision (follow-up per §11.4.107/§11.4.143).
