

Scripts Summary

Build, validation, and utility scripts for the Boba project.

Contents

- `codegraph_validate.md` "Anti-bluff verifier for the CodeGraph integration (Constitution Â§11.4.78 step 4). Proves the local CodeGraph index is real and correctly scoped using facts from CodeGraph CLI + MCP only.

Status

- Domain: Scripts
- Docs count: 1
- Last reviewed: 2026-06-08

Key Scripts (source)

Script

`scripts/
pre_build_verification.sh`

`scripts/workable-items-
export.sh`

`constitution/submodules/
docs_chain/docs_chain`

`scripts/boba-ctl.sh`

`scripts/
generate_markdown_exports.sh`

`scripts/run-tests.sh`

`scripts/run_all_challenges.sh
ci.sh`

Purpose

Pre-build gate: 24 invariants
(constitution, infrastructure, exports,
workable-items, docs chain engine)

3-step pipeline: workable-items DB
export "domain summaries" HTML/PDF/DOCX (renamed
2026-08-15 BOB-104 from
`docs_chain.sh` that name was a
misnomer; the REAL Docs Chain
Â§11.4.106 engine lives at
`constitution/submodules/
docs_chain/`)

Real Â§11.4.106 Docs Chain engine (Go
binary) "verify / sync / doctor /
graph / watch against `.docs_chain/
contexts/*.yaml`

`boba-ctl` CLI wrapper (Go binary
orchestrator)

Universal Markdown "HTML/PDF/
DOCX export (Â§11.4.65)

Test suite runner (hermetic/live/all)

Challenge suite runner

Full local CI pipeline
