

Migration Summary

Python-to-Go migration blueprint and parity tracking.

Contents

- `Migration_Python_Codebase_To_Go.md` – Comprehensive 1342-line blueprint for migrating the Python/FastAPI backend to Go/Gin, covering:
 - Project structure and data models
 - Config management and env loading
 - qBittorrent Web API client
 - Phased implementation plan with feature parity
- `PARITY_GAPS.md` – Side-by-side audit of Python vs. Go surface area, tracking: Ported, Partial, Missing, Not-Applicable

Status

- Domain: Migration
- Docs count: 2
- Migration phase: **Blueprint complete, implementation ongoing**
- Go backend status: Skeleton/rewrite-in-progress – replicates API surface but lacks plugin ecosystem, dedup, enrichment, download proxying, scheduler, and private-tracker auth
- Last reviewed: 2026-06-08

Parity Summary

Area	Python	Go	Notes
Search API	Full	Basic	Go proxies to qBittorrent's built-in search
Deduplication	Tiered + Levenshtein	Missing	Core merge service feature
Enrichment	TMDB/OMDb/ TVMaze/AniList	Missing	
Download proxy	Full (7186)	Missing	
Private-tracker auth	RuTracker/Kinozal/ NNMClub/IPT	Missing	
WebUI bridge	Full (7188)	Missing Skeleton	
SSE streaming	Full	Missing	
Scheduler	Full	Missing	
Theme injection	Cross-app	Missing
