

Scripts Summary

Build, validation, and utility scripts for the Boba project.

Contents

- `codegraph_validate.md` – Anti-bluff verifier for the CodeGraph integration (Constitution §11.4.78 step 4). Proves the local CodeGraph index is real and correctly scoped using facts from CodeGraph CLI + MCP only.

Status

- Domain: Scripts
- Docs count: 1
- Last reviewed: 2026-06-08

Key Scripts (source)

Script

`scripts/
pre_build_verification.sh`

`scripts/docs_chain.sh`

`scripts/boba-ctl.sh`

`scripts/
generate_markdown_exports.sh`

`scripts/run-tests.sh`

`scripts/run_all_challenges.sh`

`ci.sh`

Purpose

Pre-build gate: 18 invariants (constitution, infrastructure, exports, workable-items, docs chain)

3-step pipeline: workable-items export → domain summaries → HTML/PDF/DOCX

boba-ctl CLI wrapper (Go binary orchestrator)

Universal Markdown → HTML/PDF/DOCX export (§11.4.65)

Test suite runner (hermetic/live/all)

Challenge suite runner

Full local CI pipeline
