

Scripts_Summary

Scripts Summary

Build, validation, and utility scripts for the Boba project.

Contents

- `codegraph_validate.md` — Anti-bluff verifier for the CodeGraph integration (Constitution §11.4.78 step 4). Proves the local CodeGraph index is real and correctly scoped using facts from CodeGraph CLI + MCP only.

Status

- Domain: Scripts
- Docs count: 1
- Last reviewed: 2026-06-08

Key Scripts (source)

Script	Purpose
<code>scripts/pre_build_verification.sh</code>	Pre-build gate: 18 invariants (constitution, infrastructure, exports, workable-items, docs chain)
<code>scripts/docs_chain.sh</code>	3-step pipeline: workable-items export → domain summaries → HTML/PDF/DOCX
<code>scripts/boba-ctl.sh</code>	boba-ctl CLI wrapper (Go binary orchestrator)
<code>scripts/generate_markdown_exports.sh</code>	Universal Markdown → HTML/PDF/DOCX export (§11.4.65)
<code>scripts/run-tests.sh</code>	Test suite runner (hermetic/live/all)
<code>scripts/run_all_challenges.sh</code>	Challenge suite runner
<code>ci.sh</code>	Full local CI pipeline
